

Improvise FreeStyle

— HaoGuo@Coderacademy

- * Inspiration from Frustration
- * Code review

Inspiration from Frustration

1. Music tools are Expensive and Heavy to carry
2. Learning could be frustrated if tool is not handy
3. Sound is a kind of Array of numbers

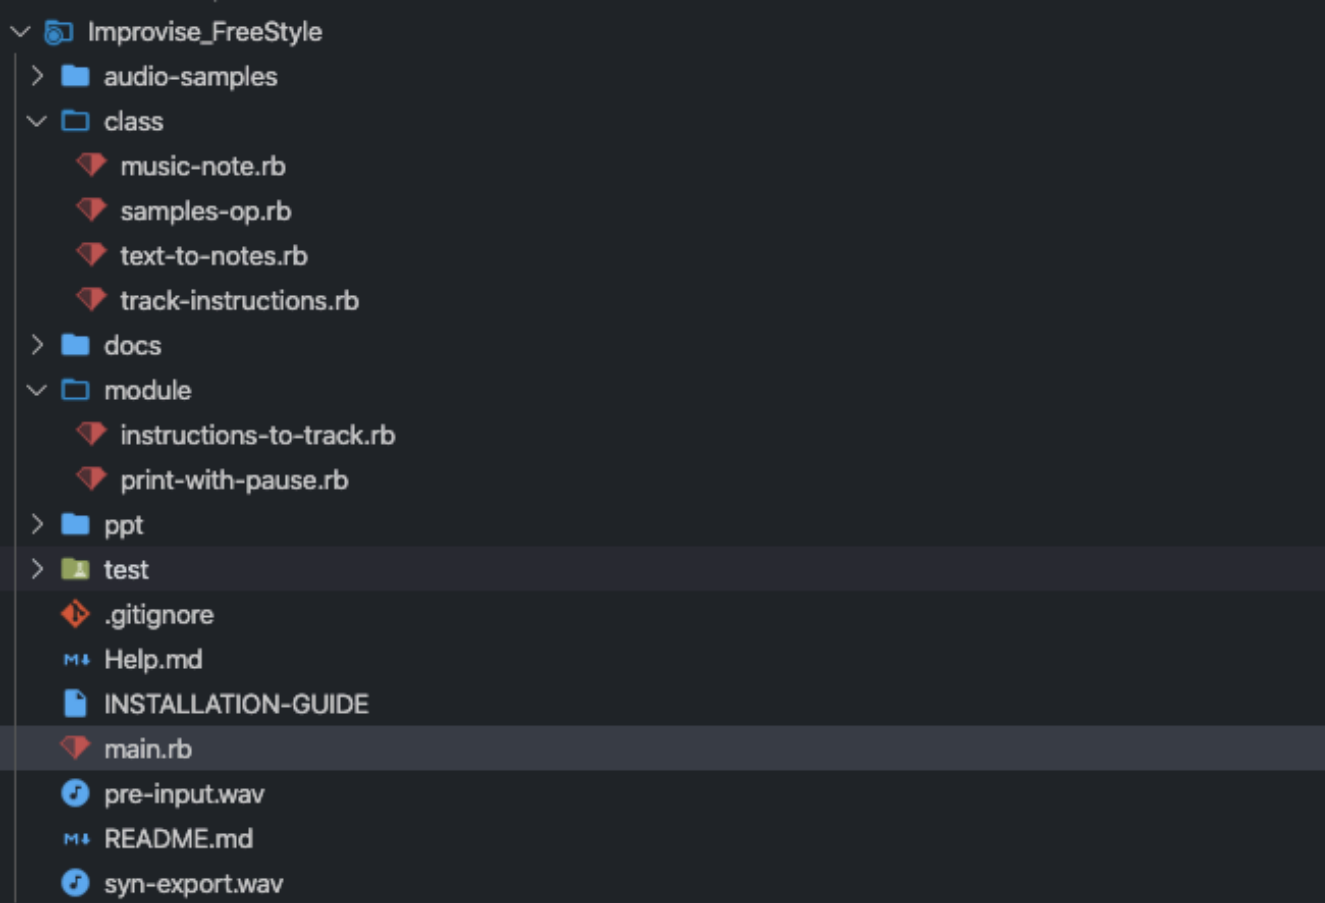

Code review

1. Feasibility

WaveFile read/write .wav file to/from array of numbers

2. Modulization

Separation for code reuse. For example, backend/frontend, general/specific tools, is-a/has-a.

- * class: where abstract functionality combined with some data attached
- * module: just some functions could be reused
- * main.rb handles all the presentation part

There might be a new kind of musician...
